OVERVIEW

Macsteel Service Centers USA's Tucson, Arizona plant is part of the company's Southwest Division.

Opened in the spring of 2007, the Tucson, Arizona location is a greenfield, 73,400-square-foot metals processing and distribution facility.

As part of Macsteel Service Centers USA's Southwest Division, the Tucson facility processes carbon and non-ferrous metals products for customers in the Southwest U.S. and Mexico.

Macsteel supplies metal products for OEM's in virtually every end use market for commercial and residential applications. Industries and applications include HVAC, automotive, building products, door lifting equipment, elevators and escalators.

SOUTHWEST DIVISION PROCESSING CAPABILITIES

The Southwest Division offers customers the most advanced metals processing technologies. Capabilities include:

- Slitting
- Leveling
- Precision multi-blanking
- Shape roll forming
- Automatic shape cutting
- Embossing
- High yield plate cut-to-length
